

## **VCREATE LOGIC TEAMS WITH SENSABLE TO FURTHER ACCELERATE DEVELOPMENT OF TOUCH-ENABLED APPLICATIONS IN INDIA**

**BANGALORE, IN, 30 OCTOBER 2007** - VCreate Logic Private Limited., a leading Scientific Visualization Product and Services company based in Bangalore, and SensAble Technologies, Inc., developer of the industry's leading 3D touch-enabled modeling systems, haptic devices and toolkits based in the United States, today announced that VCreate Logic is a reseller partner for SensAble PHANTOM® haptic devices and the OpenHaptics® toolkit throughout India. Through this sales partnership, VCreate Logic will offer software and hardware solutions to educational and research institutions and companies in India who wish to leverage the power of 3D digital environments that include the sense of touch.

“With their proven performance in delivering visualization products and technology consulting services, VCreate Logic is an ideal partner for SensAble in India,” said Joan Lockhart, Vice President of Sales and Marketing for SensAble. “We are especially excited about their development efforts to provide a software solution that works in conjunction with our PHANTOM devices to streamline the creation of haptic applications.”

“We’re delighted with the association and the opportunity to bring SensAble devices that add the sense of touch to 3D applications, to India” said Kiran T.N., Manager – Business Development at VCreate Logic “This marks a key addition to our growing line of technology solutions and offerings to customers and product users.”

### **ABOUT SENSABLE HAPTIC DEVICES & TOOLKITS**

SensAble PHANTOM haptic devices are used by researchers, scientists and OEMs to incorporate a sense of touch to customized applications such as medical simulation or tele-robotics. The Premium models are high-precision instruments that provide large workspaces, the ability to customize the stylus, the highest force feedback, and up to 6DOF (6 degrees of freedom) output capabilities. The PHANTOM® Desktop™ and PHANTOM Omni® devices are affordable desktop solutions with small footprints.

The SensAble OpenHaptics® toolkit enables developers to add haptics and true 3D navigation to a broad range of applications. The toolkit is patterned after the OpenGL® API, making it familiar to graphics programmers and facilitating integration with new or existing OpenGL applications. This haptics toolkit handles complex calculations, provides low-level device control for advanced developers, and supports polygonal objects, material properties, and force effects.

### **ABOUT VCREATE LOGIC PRIVATE LIMITED**

VCreate Logic was founded in the mid 2005 with a prime focus to provide Visualization products and Technology Consultancy Services to the global market. Their Flagship product VTK Designer – visualization development platform, which helps in building complex 3D visualization systems and applications, is been widely used and appreciated by researchers and developers around the world. VCreate Logic expertise in providing scientific and non-scientific data exploration systems, visual editors for solver systems, complex UI controls and application frameworks based on C++, OpenGL,

VTK and Qt provides technology consultancy services.

**ABOUT SENSABLE TECHNOLOGIES, INC.**

SensAble Technologies is a privately-held company headquartered in Woburn, Massachusetts that provides software and devices that add the sense of touch to the digital world, including the FreeForm® 3D touch-enabled modeling systems and the PHANTOM® line of haptic devices and OpenHaptics® toolkit. SensAble modeling systems are used for product design, medical and dental modeling, digital content creation, and fine arts. The PHANTOM force-feedback devices, which enable users to touch and manipulate virtual objects, and the developer toolkit, are used for simulation and training, robotics, and third-party development. In addition to off-the-shelf solutions, SensAble offers contract development to OEMs for new and customized software applications and haptic devices. SensAble products are available through direct and reseller channels worldwide. [www.sensable.com](http://www.sensable.com)
